

Application No.: 10/680,963
Amendment Date: February 21, 2008
Reply to Office Action of: April 20, 2007

AMENDMENTS TO THE SPECIFICATION:

Please replace paragraph [0090] beginning at line 1 on page 27 with the following paragraph.

[0090] A lower eukaryotic host cell, when used herein in connection with glycosylation profiles, refers to any eukaryotic cell which ordinarily produces high mannose containing N-glycans, and thus is meant to include some animal or plant cells and most typical lower eukaryotic cells, including uni- and multicellular fungal and algal cells.
